

# ABDULMUTALIB OZOMATA JAMIU

Abuja, Nigeria / legendmulan0@gmail.com / 234 906 829 7619

---

## Summary

Software engineer and AI enthusiast with 5+ years building scalable web and mobile applications that drive business growth. Delivered solutions for energy, education, and real estate sectors from enterprise infrastructure to customerfacing platforms that enhance operational efficiency and deliver real business value.

---

## Experience

### KadMap Systems Limited

Software Engineer | Engineering Manager

01/2020 - 11/2025

- Led and mentored a team of 11 engineers, establishing development workflows, conducting code reviews, and fostering a collaborative engineering culture
- Architected and developed KadMap Client (Electron-based desktop application) enabling secure workspace access for 4+ enterprise clients via WireGuard VPN
- Built master repository and artifact management system with MinIO integration, optimizing update downloads by 10% and implementing version control
- Engineered lightweight Desktop Environment (OS.JS-based) supporting multiuser workspaces with real-time collaboration and custom configurations
- Developed full-stack KadMap Admin platform managing users, workspaces, devices, applications, and system updates for enterprise administrators
- Built KadMap Drive file management system and conversation app with collaborative features including file locking, commenting, and group chat channels for workspace communication
- Integrated OnlyOffice suite with custom UI, deploying document server infrastructure for enterprise productivity

### Klosters Energy Services

Software Engineer

01/2020 - 12/2024

- Developed real-time 3D asset visualization system with sensor health indicators for industrial plant monitoring, enabling proactive maintenance decisions
- Built Gantt chart-based maintenance scheduling module, improving maintenance planning efficiency by 60%
- Engineered sensor data analysis pipeline transforming raw field data into actionable insights for operations teams

### LaChariz Group

Fullstack Developer

01/2024 - 10/2025

- Developed a full rental management backend that powers customer and admin portals for generator bookings, invoicing, and payments, replacing manual processes with a streamlined digital workflow.
- Automated invoice approval and payment handling, improving operational efficiency and reducing manual financial processing for PPS.
- Developed unified admin dashboard interfaces for 4 platforms (homes, travel, furniture, innovations), streamlining content management operations
- Built full-stack solutions enabling efficient multi-platform database management and content operations
- Enhanced operational efficiency for customer service teams through integrated platform management tools

### TeloHub Inc

Software Developer | Tutor

01/2019 - Present

- Mentored 5 students through comprehensive software development training, contributing to 100% program completion rate
  - Delivered 10+ client projects including VTU platforms, e-commerce sites, and portfolio websites, averaging 3 to 6 week delivery vs. industry standard of 4 to 12 weeks
  - Built responsive user interfaces using modern frameworks, consistently exceeding client quality expectations while meeting aggressive timelines
- 

## **Skills**

Full-Stack Development, JavaScript/TypeScript, React.js/Next.js, Node.js/Nest.js, Git, Team Leadership, System Architecture, Performance Optimization, Cloud/DevOps (AWS), Database Management, Agile Methodology, Problem Solving, Fast Learner, React Native

---

## **Key Achievements**

### **Experience & Leadership**

- 5+ years full-stack software engineering experience
- Led and mentored team of 11 engineers with proven results
- Consistently deliver projects 50% faster than industry standards

### **Technical Expertise**

- Expert in JavaScript/TypeScript ecosystem (React, Node.js, Next.js, Nest.js, Electron.js)
- Specialized in 3D visualization, real-time systems, and secure networking
- Proficient in cloud technologies (AWS), containerization (Docker), and DevOps

### **Proven Impact**

- Improved operational efficiency by 10-60% through performance optimization
- Deployed enterprise solutions serving 4+ major clients
- Built systems serving users across multiple industries
- 100% student completion rate in training and mentorship programs
